The red ones are problematic. The are substantive quality issues with the analogue selection/POD/hazard calls that need to be resolved.

That is why we started with the "green" ones and laying out the process for the "easy" ones.

I heard back from the last HH assessor on my side. We had a verbal discussion. thinks the proposal for clearing green cases sounds reasonable, but pointed out (rightfully so) that the controversial ones will be the red cases. And it will be important to be transparent on that.

Attached are the responses that I got from Ex. 6 Personal Privacy (PP) had very good questions and comments that could be used to improve the process. I will suspend judgement on whether they are concerned about the proposed process for the "green cases". Their emails are clear and transparent and should get you an idea of their opinions/comments.

Hi [REDACTED]

I looked over the written process and added a few questions/comments in this version. Hope this helps!

For now, please hold from implementing the SOP for Human Health assessment for the "green" cases. Please complete the following steps and respond to me with the feedback.

1. For the HH assessors that you supervise, please reach out to them individually and ask if they have any concerns with the proposed SOP to QA/QC the HH assessments.
2. For the assessors that you supervise and will be asked to conduct the QA/QC for the green cases, please reach out to them individually and ask they are comfortable with proceeding to conduct the QA/QC under the proposed SOP.

Once I get responses to these questions from you both, then we assess the feedback and make a decision on next steps. Thanks.
